

EXPERTS AT WORK

Not yet signed up for our Seminar on October 10? Our impressive line up of authorities in their fields will ensure you do

SANJIV MALVI

Life at home at the push of a button? It is possible, vis a vis Intelligent Homes. Homes that anticipate your moods and your needs. Lights that dim, music that turns on, and curtains that draw....all at the click of a remote. Sanjiv Malvi will show you how.

Educated at the Indian Institute of Technology Mumbai, he pursued his passion in technology. An innate love for gizmos and technology led from one thing to the other – culminating into a designer line of high-end hand-crafted speakers for the connoisseur in the 90's. This was followed by his path breaking developments in the domain of sound technology which resulted in the now famous Videocon's Bazoomba, Bazzon, Sansui's Hard Rock, Mega flat, and Toshiba's Realism in sound. He has also been adviser to Videocon, Sansui, Phillips, Salora and Sunvoice.

He has also conceptualised the idea of 'The Listening Room' – a uniquely balanced listening environment for music.
